profile

Ambitious bilingual student and career changer focused on expanding knowledge and abilities in programming and website design. Looking to work in a collaborative environment, and creating elegant & user-friendly web solutions. Creative problem solver able to communicate well with teams. Will come with a strong sense and motivation to bring value by learning continuously and growing professionally.

selected projects*

Brokeflix (see live)

Inspired by Netflix - I created a movie stream platform where users can login and watch movies classified in five categories - for free and legally through the YouTube API.

Learned to manipulate data delivered through an API and display it nicely with user-centric approach by using JSX.

★ **Tech Stack includes** React, JavaScript, JSX, CSS3, Express, Node.js, Axios & PostgreSQL

Social Network SPA (see live)

A single-page application website that allows users to join a social network, add their biography, upload their profile image, send, receive and decline friend requests, visit other users profile and chat online.

★ **Tech Stack includes** React, Redux, JSX, CSS3, Express, Node.js, socket.io, Axios, AWS S3 & PostgreSQL

Imageboard SPA (see live)

A minimalistic Vue.js single-page-application where anyone can post an image of their choosing, add a title and description, and comment on images.

In this project I learned how to use Vue.js as a front-end framework and how to upload images to the cloud using Amazon Web Services S3.

★ **Tech Stack includes** Vue.js, Handlebars.js, CSS3, Express, Node.js, Axios, AWS S3 & PostgreSQL
